

FINAL PUBLIC NOTICE

The Federal Emergency Management Agency (FEMA) has received the subgrant application for South Florida Water Management District C111 drainage channel repair due to damages in Hurricane Irma (DR-4337-FL PW 06198). Pursuant to Executive Order 11988 and 44 CFR Part 9.12, final notice is hereby given of FEMA's intent to provide funding for this project under the Public Assistance (PA) Program.

An initial disaster-wide Public Notice was published October 6, 2017 for Hurricane Irma. Comments and other information received were fully evaluated by FEMA along with evaluation of social, economic, environmental, and safety considerations. This notice serves as a project-specific final notice for FEMA's funding action located within the floodplain.

Funding for the proposed project will be conditional upon compliance with all applicable federal, tribal, state and local laws, regulations, floodplain standards, permit requirements and conditions. This action complies with the National Flood Insurance Program (NFIP) requirements.

Responsible Entity:	FEMA Public Assistance (PA) Program
Applicant:	South Florida Water Management District
Project Title(s):	PA-04-FL-4337-PW-06198; 28956 - Water Control Facilities Multiple Locations
Location of Proposed Work:	(25.40270, -80.55820) to (25.36209, -80.52595)
Floodplain:	Project is located in the A Zone, otherwise known as the area of 100-yr flooding, per Miami-Dade County FIRM Panels #12086C0720 L and 12086C0860 L, dated 09/11/2009.
Proposed Work and Purpose:	The South Florida Water Management District will replace 4,668 CY of fill at Canal C111. Repairs will restore the canal's flood control function and bring it back to its pre-disaster design and capacity within the existing footprint. The South Florida Water Management District is responsible for obtaining any necessary USACE and FDEP permits for the work and for confirming compliance with permit conditions.
Project Alternatives:	The alternative that has been considered is the no action alternative. This alternative is not feasible as the area will remain vulnerable to flood risk, including hazards to human life and safety. With the no action alternative, continued negative impacts on adjacent property, roads, and the community may be experienced. Alternate locations were not considered as the canal and the flood control function is functionally dependent upon its location within the floodplain. The facility also provides open space uses for recreation and habitat for wildlife.
Comments:	This will serve as the final public notice regarding the above-described action funded by the FEMA PA program. Interested persons may submit comments, questions, or request a map of this specific project by writing to the Federal Emergency Management Agency, Region 4, 3003 Chamblee-Tucker Road, Atlanta, Georgia 30341, or by emailing FEMA-R4EHP@fema.dhs.gov. Comments should be sent in writing with the subject line FL-4337-PW-06198, South Florida Water Management District at the above address within 15 days of the date of this notice.
